

ANGLATECNIC

FINGERCLOUD ONLINE EDITORS

The Online Editors are cloud-based applications with a user-friendly interface to create, edit and verify **subtitles**, **audio description** and **sign language** for **media access services**.

These Online Editors are inter-connected to the FingerCloud ACM for metadata and video, access service and support files.

Cloud-based

Full access services

Full inter-connections

Multi-language support

Immersive content

WEB ST EDITOR

WEB AD EDITOR

WEB SL EDITOR

WEB ST EDITOR

A cloud-based editor to create, edit and verify subtitle files for access services such as SDH subtitles, open subtitles and spoken subtitles

- Standard and user-configurable shortcut keys for commonly used operations.
- Preview modes for final verification purposes. 360° videos can be previewed via Specific HMD models.
- Character for SDH (Subtitles for the Deaf or Hard-of-Hearing) to distinguish the subtitles of each speaker. The characters are highly configurable and easy to switch between them.
 - Up to 3 characters per subtitle.
- User and file hyper-personalized settings.
- Compatible with 2D and 360° (immersive) videos.
- Integrity check for warnings and errors on quality constrictions.
- Special subtitle tools required by professional users such as batch edition, insert/join/split subtitles, letter count, etc.
- On-screen display of full script and time codes for easy navigation.
- Graphical aids such as thermometers, timeline wiht audio waveform and subtitle drag tools.

Web ST Editor is available in English, Spanish and French with possibility for more languages to be added

WEB AD EDITOR

A cloud-based editor to create, edit and verify audio description files for TV, radio and online media

- Standard & user-configurable shortcuts for common operations.
- User and file hyper-personalized settings.
- Script edition in the same editor with segment metadata (time codes, main audio dipping, etc.) and script import.
- Segment audio either generated automatically with Voice Synthesis of the segment script or recorded form the microphone connected to the computer by reading the segment script.
- Special audio description segment tools required by professional users such as batch edition, audio edition tools (cut, split), short and long test, etc.
- Compatible with 2D and 360° (immersive) videos.
- Integrity check for warnings and errors on quality constrictions.
- Graphical aids such as thermometers, timeline with audio waveform and segment tools.
- Preview modes for final verification purposes.
- Audio description segments (audio files and metadata) are stored in a single compressed file allowing a better exchange between platforms.

Web AD Editor is available in English, Spanish and French with possibility for more languages to be added

WEB SL EDITOR

A cloud-based editor to create, edit and verify sign language files for TV and online media

- Standard and user-configurable shortcut keys for commonly used operations.
- User and file hyper-personalized settings.
- Interpreter video either recorded from camera connected to the computer or from video file.
- Subtitles for the deaf or hard of hearing sing language interpreters during the interpreter recording.
- Special sign language segment tools required by professional users such as metadata (time codes, character, speaker's name, etc.), batch edition, insert/delete/join/split SL segment, etc.
- Compatible with 2D and 360° (immersive) videos.
- Integrity check for warnings and errors on quality constrictions.
- Graphical aids such as thermometers, timeline wiht audio waveform and segment tools.
- Preview modes for final verification purposes.
- Sign language segments (video files and metadata such as time codes and character information) are stored in a single compressed file allowing a better exchange between platforms.

Web SL Editor is available in English, Spanish and French with possibility for more languages to be added
